PROFESSIONAL EXPERIENCE

Box of Tech - Associate Software Developer

November 2022 - January 2025

Project: Compass

- Developed a real estate application and contains three panels which is admin, user and agent.
- Admin can create grounds, and it is divided into plots based on square feet.
- Customer can book the plot by the reference of agent and if the customer paid partial amount of actual plot amount and agent will get the spot incentive or if they paid total amount of plot then agent will get full incentive.

Project: TCDS Computer Education System

- Designed and implemented admin functionalities to manage franchisee requests (approve, lock, unlock).
- Developed features for adding, modifying, and deleting courses and subject details.
- Streamlined franchisee material dispatch and student certification approval processes.

Project: Mall Net India Insurance Broking

- Designed and implemented modules for registering new insurance policies, including detailed policy views, approval processes, and commission status tracking.
 - Developed features to manage POSP requests, enabling approval or rejection them.
 - Designed and implemented a reference-wise policy listing feature. Developed functionalities to create, edit, and update vehicle details.
-
