Naseem Rahman

Summary

As a **Senior Frontend Developer** with **5 years of hands-on Angular experience**, I have led impactful projects, including a standout crowdsourcing product at **TechUp Labs**. My expertise in **Angular** and **TypeScript**, combined with a problem-solving mindset, helped achieve **100% code coverage** on critical banking solutions at **Tata Consultancy Services Limited**. Currently, I am expanding my skill set as a **learning React developer**, further enhancing my ability to build modern, dynamic web applications. I take pride in creating clean, intuitive **UI designs** and building strong relationships through effective **client communication**.

Experience

TechUp Labs - Senior Frontend Developer

Remote, IN

05/2022 - Current

Lead Frontend Developer Role:

- Served as the Lead Frontend Developer for over two years, spearheading the development of a crowdsourcing product.
- Designed and built the user interface, implemented APIs, integrated payment services using Angular, and conducted thorough testing.
- Collaborated closely with the backend developer, analyzed requirements, and actively communicated with partners to suggest features and improvements.

Partner Product for Design Agency:

- Collaborated on a partner product for a design agency (freelancing portal), delivering an exceptional UI and robust functionalities using Angular.
- Ensured comprehensive testing across all scenarios, implemented AI features, and maintained active communication with the client throughout the process.

In-House Products Development:

- Developed two in-house products, leveraging React to create dynamic UIs and implement core functionalities.
- Integrated API services seamlessly while applying newly acquired skills and knowledge in React.

Tata Consultancy Services Limited - Assistant System Engineer

Bangalore, IN

01/2020 - 05/2022

- Worked as an Angular Developer on a banking project, contributing to two major projects using the latest Angular technologies.
- Developed user interfaces, integrated backend services, handled API data, and implemented key functionalities.
- Coordinated effectively with frontend and backend teams, achieving 100% code coverage through comprehensive unit testing.

- Resolved critical bugs and issues prior to release, ensuring timely delivery of high-quality solutions.
