WORK EXPERIENCE

SOFTWARE DEVELOPER

Nov'23-Nov'24

ProDT Consulting Services Pvt Ltd

Worked on significant projects that enhanced operational efficiency and improved user experiences. Collaborated with clients to deliver high-quality services. To date, I have worked on over 5+ products, including notable projects such as:

1. Travel Souk

- Implemented feature to send notifications to users when the prices of flights, hotels, or rentals drop, allowing them to take advantage of lower rates.
- Implemented features that allow users to make payments directly through the app for booking services. Use payment gateways like Stripe, Razorpay, or Google Pay.
- Developed the feature that enable users to leave reviews and rate flights, hotels, or car rental services, and view ratings before booking.

2. Shockwave

- Developed a feature that notify users when a post is successfully published, scheduled, or failed to publish, with details on any issues that need attention.
- Integrated link-shortening services (like Bitly) directly within the app, allowing users to shorten URLs before posting.
- Implemented feature that allow users to save posts as drafts, enabling them to come back later to edit or schedule them for publishing.

SOFTWARE DEVELOPER INTERN

Sept'23-Oct'23

- Designed and Implemented push notification functionality in a flutter App(Tennis Court booking App) by integrating firebase cloud messaging(FCM).
- Successfully implemented bilingual support (Arabic and English) in a Flutter app through efficient localization and internationalization techniques.

EDUCATION

MASTER OF COMPUTER APPLICATION || GGITS, JABALPUR

86% || 2021-2023

BACHELOR OF COMPUTER APPLICATIONS || SAC, JABALPUR

79% || 2018-2021

PROJECTS

Grocery E-Commerce App

- Implemented a robust cart management system with Provider for efficient state management and real-time updates.
- Integrated payment gateway to process secure online transactions, ensuring a smooth checkout experience.
- Designed a user-friendly interface to display product categories, item details, and real-time inventory updates.

Realtime Chatting App | [GitHub Link](#)

A flutter based mobile application which allow users to chat in real time. Key features include -

- Developed a real-time chat application using Flutter with Firebase backend for authentication and cloud storage.
- Implemented user authentication using Firebase Authentication, allowing users to sign up, log in, and log out securely.
