## PROFILE

Fullstack Developer with 1.5+ years of experience building and maintaining web applications. Skilled in both front-end and back-end development, with a strong understanding of web development frameworks, APIs, databases, and version control systems. Enthusiastic about learning new technologies and contributing effectively within collaborative team environments.

---

## WORK EXPERIENCE

### Thirdrock Techkno, Jr. Full Stack Developer

July 2023 - Present

- Optimized and refined front-end components to ensure a seamless user experience.
- Leveraged ReactJS to build dynamic and interactive UIs.
- Managed the backend infrastructure and server-side logic of web applications.
- Architected and deployed RESTful APIs to facilitate data communication between the frontend and backend.

### Thirdrock Techkno, Intern

Jan 2023 - June 2024

- Developed reusable React components to enhance scalability.
- Built a web application inspired by BurgerKing, integrating APIs with React.js on the frontend and NestJS on the backend.
- Delivered full CRUD functionality in a Todo application, improving task management and user productivity.

---

## PROJECTS

### 1. P-Avatar (Real-Time Marketplace Platform Application)

#### Description:

- Platform that connects clients with real-time video feeds from desired locations. The application allows users to virtually explore areas through live streams provided by individuals (Avatars) present at those locations.

#### Responsibilities:

- Developed APIs using NestJS for the backend and built a ReactJS-based admin dashboard for managing users and streams.
- Secured the platform with AWS Cognito for authentication and authorization.
- Integrated AWS SES for sending automated emails.
- Implemented push notifications using Firebase to enhance user engagement.

### 2. Riyo

#### Description:

- An AI-powered toolkit designed to increase website conversion rates by providing insights into visitor behavior and motivations. The tool is easy to install and use with a single script.

#### Responsibilities:

- Designed Restful APIs and set up automated data retention processes via cron jobs.
- Enhanced frontend with bulk deletion features for leads, chats, and visitors and optimized session recording for better tracking.
- Troubleshoot and fixed frontend bugs, improving the user interface and analytics.

### 3. PayTraquer

#### Description:

- A US-based account management portal that integrates with Stripe, Amazon Pay, BigCommerce, PayPal, and WooCommerce to sync online sales data with accounting applications like QuickBooks and Intuit.

**Responsibilities:**

- Designed dynamic data visualizations using ReactJS and Redux, improving user insight into payment data.
- Created reusable components and real-time graphs for tracking payments.
- Integrated APIs for seamless communication between payment systems and accounting applications.

**4. Thirdrock Techkno website**

**Description:**

- A business management web application focusing on improving workflow efficiency and user interaction through an intuitive frontend interface.

**Responsibilities:**

- Designed responsive and user-centric interfaces using NextJS.
- Ensured smooth data exchange by integrating APIs with backend services.
- Built reusable components to boost scalability and reduce development time.

**5. Shimmer Effect (Personal Project)**

**Description:**

- A customizable open-source React library for adding sleek shimmer effects to applications. The library allows developers to implement engaging loading animations for various UI elements, enhancing user experience.

**Contributions:**

- Developed key components like Shimmer Content Block, Shimmer Category Items, and Shimmer Table.
- Focused on developer ease-of-use and flexibility when integrating the effects into applications.

---

**EDUCATION**

<b>Master of Computer Applications GLS, Ahmedabad</b>	<b>2021 - 2023</b>
Percentage : 81.4%	
<b>Bachelor of Computer Applications GLS, Ahmedabad</b>	<b>2018 - 2021</b>
Percentage : 89.5%	

---
