Projects

➤ TaskEasy

Description:

TaskEasy is a web-based platform that connects customers with service providers for home and outdoor cleaning services, including grass cutting, ice removal, and floor cleaning. The system enables seamless booking, tracking, and management of cleaning services.

Key Responsibilities:

Developed dynamic and reusable components, worked on libraries like te-pdf and te-stylesheet, and implemented image zoom-in and zoom-out functionality for image zoom. Integrated Google Maps API for service location selection and tracking. Built interactive features like manage-account, quality-control, user-management, bulk-order, etc.

Technology Used :

Frontend: Angular 16 , 17, TypeScript, JavaScript, HTML5, CSS

Backend (API Integration): RESTful APIs

UI Frameworks: Angular Material, Bootstrap

Tools: Jira, BitBucket, Postman, VS Code

➤ LooksLy Web & LooksLy Admin

LooksLy is a dynamic web-based social media platform designed to connect users with like-minded individuals, providing a space for networking, sharing content, and fostering community engagement. The platform focuses on creating an interactive environment for users to connect, share posts, and manage their profiles effortlessly.

Key Responsibilities:

Worked on developing and optimizing various modules, developed interactive features such as profile management, friend requests, and notifications. Contributed to building essential features such as user management, content moderation, activity feed, and comment sections.

Technology Used :

Frontend: Angular 16, TypeScript, JavaScript, HTML5, CSS

Backend (API Integration): RESTful APIs

UI Frameworks: Angular Material, Bootstrap

Tools: GitLab, Postman, VS Code
