## Projects

**Project: Integrated CRM Application (Client: Allan Myers, USA | Domain: CRM)**

CRM management system is an application, which helps organization to create a logical pipeline, which will help an organization to maintain existing customers and to acquire potential customers in a very efficient way. Along with this, CRM management system helps to maintain internal data like roles and responsibilities of individuals working for organization, products, quotations etc. in a very efficient manner.

- We can add notes/comments if we want changes on that specific quote.
- We can also ask specific person to review the created quote and needed any changes from there end.
- We can also print the created quote, export this quote to excel, copy quote into another quote in case if we want to share this quote details with other peoples.
- Email notifications are also sent to specific users if we want any specific action from there end on any created quote.

**Key Contributions:**

- Designed and executed functional test cases.
- Performed API Testing using Postman & RestAssured.
- Conducted Regression, UI, and Database Testing.
- Actively participated in Scrum meetings & defect resolution.
- Automated test cases using Selenium & Java.
- Performed Functionality Testing, Retesting and Regression Testing.
- Reporting the Regular status to the higher authorities in a timely manner.

**Project: Informa Markets (Client: Admiral Media | Domain: Media & Digital Marketing)**

**Description :**

Digital marketing utilizes internet and online based digital technologies and platforms to promote products and services. Google ads make it easy to show what is unique about products and services, so they can reach customers searching for what they offer. Media ecosystem helps to decide and manage related data. So, user can decide where he would like to show ads and will get them in front of the right people. Media ecosystem is useful to set and manage budget cap for campaigns.

So, the user never pays more than daily, weekly and monthly budget cap and adjust it anytime. Also, user able to make changes across campaigns with ease and control multiple accounts from a single Dashboard. Plus, application will recommend budget based on business performance along with estimated budget and campaigns in user friendly manner on media ecosystem.

**Key Contributions:**

- Developed Test Cases & Test Scenarios for end-to-end testing.
- Performed Functional, Regression, and Database Testing.  
Automated testing using Selenium WebDriver & POM Framework
- Actively participated in client meetings & requirement analysis.

**Additional Skills**

- Agile & Scrum Methodologies.
- Test Case Design & Traceability Matrix.
- API & Web Service Testing.
