

# BHAVIN GHEVARIYA

## MERN Stack Developer

As a MERN Stack Developer, I take full ownership of projects from inception through deployment, ensuring that client specifications are accurately translated into functional, high-quality web applications. My approach emphasizes close collaboration with clients to understand their needs and consistently deliver solutions that exceed expectations.

I am looking for a position that challenges my web development skills, particularly in creating scalable web applications for diverse businesses. I have expertise in MongoDB, Express.js, React.js, Node.js, Ruby on Rails (RoR), and basic web development technologies. Additionally, I am proficient in popular React tools such as Webpack and Redux.

Eager to expand my expertise by working on various platforms, my goal is to become a champion Web Developer, continuously improving my skills and delivering top-tier solutions.

MongoDB

HTML

## Experience

### MERN Stack Developer Freelancing

Jan 24-Oct 24

- MERN Stack Developer with extensive experience in designing and developing both static and dynamic components to meet specific client requirements.
- Proficient in backend development using Node.js and Express, with a strong focus on Express Validation and CRUD API development (GET, POST, PATCH, DELETE, PUT).
- Expertise in MongoDB integration using Mongoose for efficient database and collection management.
- Skilled in UI development with React.js, Material UI, Next.js, Bootstrap, Ant Design, and responsive design with CSS, HTML, and SCSS. Adept at API integration through React.js, AJAX, and Next.js, with experience in custom validation using React Hooks.
- Comfortable working in any environment and managing multiple tasks under pressure, ensuring high performance and adaptability.
- Experienced in cloud services like AWS, and knowledgeable in TypeScript and modern front-end frameworks.

### React-Node Developer Dignizant Technologies LLP

Jan 22-Dec 23

- Revised, modularized, and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Maintain existing React systems, including fixing bugs
- Designed, developed, and implemented software applications for websites based on analyzed requirements and understanding of industry technical standards.
- Maintain and update project dependencies as well as fix any conflicts.
- Working with other JavaScript developers to develop front-end and back-end architecture that's well structured and flexible, along with the APIs to support it.
- Collaborate with project managers, senior developers and team leader.
- Writing code according to the requirements of React JS, Node JS, Next JS.
- Having sound experience and exposure on UI development using React JS, Bootstrap, Material Ui, HTML, CSS, React Hooks, Material Icon and Redux etc.

Next JS

MySQL

Material UI

Bootstrap

Javascript

Redis

CSS

RoR

Redux

## Language

Hindi

## RoR Developer Freelancing

6 months

Doing one project in RoR (Local Music Booking System)

- Developed a full-stack web application using Ruby on Rails as the backend framework.
- Designed and implemented RESTful APIs, database models, and controllers to manage data flow efficiently.
- Leveraged Active Record for seamless database integration and MVC architecture to ensure clean, maintainable code.
- Focused on building scalable, dynamic web features and integrated third-party APIs for extended functionality.

### Summary

- Experienced MERN Stack Developer with a proven track record in designing and developing both static and dynamic components based on specific requirements.
- Proficient in using Node.js and Express, with a focus on Express Validation and CRUD API development (GET, POST, PATCH, DELETE, PUT), TypeScript, JavaScript, HTML, CSS, and modern front-end frameworks, GitHub code management.
- Skilled in MongoDB integration using Mongoose for efficient database and collection management.
- Expert in UI development with React.js, Material UI, Next.js, Bootstrap, Ant Design, CSS, HTML, and SCSS. Capable of API integration through React.js, AJAX, and Next.js, with experience in React.js-based custom validation using React Hooks.
- Strong in managing application-level state with Redux and Redux hooks, and designing highly complex components with minimal third-party dependencies.
- Demonstrated ability to work under any environment, manage multiple tasks in high-pressure situations, and deliver solutions that exceed client expectations.
- Collaborates directly with clients to gather requirements, provide regular updates, and integrate feedback effectively.
- Adept at implementing API connectivity with axios or fetch.
- Committed to pushing technical boundaries to deliver scalable and efficient web applications.
