- BE in 2020 from Amravati University.

Technical Expertise

- Language   : Core JAVA
- Tools   : JIRA, Selenium, Postman, SQL Server, Eclipse IDE, TestNG

Projects Handled

Project 1

- Project Name   : Audience Analysis
- Domain   :   Healthcare
- Client   : WebMD

Description: The main objective of the project is to create an audience for use in marketing campaigns. To create an audience, you use filters to select patients and prospects based on a variety of traits and characteristics and then build out logic to include/exclude those selected individuals as needed. Organisation joins clinical encounter, consumer and patient data in a single database that serves as our data source. Once you are ready, you can export audience lists to third party applications such as marketing automation systems.

Responsibilities:

- Participated in analysing Requirement Document, Design Document and getting clarification on the requirements if required.

- Participated in preparing Test Scenarios, writing positive, negative and boundary value level test cases based on the given Requirement, Design Document, Technical Specification Document.

- Created/maintained quarter wise & sprint wise test cases excel sheet to record all written & executed test cases for every JIRA ticket.

- Participate in daily scrum meeting to give daily work status also involved in sprint planning, refinement & retrospective meeting.

- Designed & executed selenium automation test scripts using Selenium Driver.

- Executed SQL Queries to test the back-end functionality of the application.

- Performed Smoke Testing on each new Build.

- Execute test cases, log bugs, verify the bug, close if fixed.

- Sending Build wise status Report and Weekly Status Report to my Lead.

Project 2

- Project Name   :   Venture Capital System

- Domain   :   Investment Banking

- Client   :   K2 VENTURE CAPITAL

Description: Major subsidiaries include K2 VENTURE CAPITAL, which offers retail services such as online trading to individual investors and investment banking as well as K2 VENTURE CAPITAL Markets, the firm's international investment banking firm that provides M&A advisory, sales and trading services in a variety of financial products to corporate and institutional clients. Other group companies provide asset management, research and private equity fund services any financial workflow.

Responsibilities:

- Executing test cases (manual) and analysing results.

- Working with cross-functional teams to ensure quality throughout the SDLC.

- Monitoring and creating logs to document testing phases and defects.

- Performing functional testing of features for release cycles, including creating/executing test cases, raising defects and maintaining defect logs.

- Implementing QA processes, standards & controls.

- Understand the service architecture and workflow to plan the testing.

Personal Details

- Date of Birth   : 19th April 1995

- Current Address   : 502-Chandan Colozium, Wakad (PUNE) - 411057

- Permanent Address : Vitthal Nagar, Digras, At post.Digras, Dist.Yavatmal(MS) – 445203

- Marital status   : Single

- Nationality   : Indian

- Language Known   : English, Marathi, Hindi
