📍 8 East Street kariyur, Dharapuram, Tiruppur-638661

SUMMARY

Front-End Developer with 3 years of experience building responsive, user-centric web applications using ReactJS and Angular. Skilled in HTML5, CSS3, JavaScript, and creating dynamic interfaces. Experienced in optimizing performance, ensuring cross-browser compatibility, and collaborating with back-end teams. Committed to writing clean, maintainable code and staying updated with industry trends.

EDUCATION

Bachelor of Science in Computer Science

Government Arts College

📅 03/2017 - 03/2020   📍 Coimbatore, India

EXPERIENCE

Front-End Developer

SBNA Software Solutions

📅 03/2022 - Present   📍 Coimbatore, India

- Designed and developed responsive and interactive user interfaces using Angular and Typescript
- Created reusable and modular components in Angular for maintainable and scalable applications.
- Implemented Angular services, directives, and pipes to enhance functionality and streamline code.
- Used Bootstrap to create responsive layouts that work seamlessly across different devices.
- Implemented two-way data binding in Angular to synchronize data between the model and view
- Integrated RESTful APIs to fetch and manipulate data dynamically
- Used Git for version control, including branching, merging, and managing pull requests
- Stayed updated with the latest trends and advancements in frontend development, Angular, JavaScript, Bootstrap, and Material UI
- Created user guides and technical documentation as needed.

Powerapps Developer

SBNA Software Solutions

- Developed a web application using Microsoft Power Apps to streamline desk reservation processes within an organization.
- Utilized Power Automate to create automated workflows for booking confirmations, notifications, and data management.
- Leveraged SharePoint as a central data source for storing desk information, user details, and reservation data.
- Successfully deployed the app to Microsoft AppSource, making it accessible to a wider audience (mention specific functionalities if applicable, e.g., user authentication, real-time availability, filtering options).

CUSTOMER SUPPORT EXECUTIVE

Zealous Services

📅 12/2020 - 12/2021

- **Handled Inbound and Outbound Calls:** Managed a high volume of inbound and outbound calls efficiently and effectively to ensure customer satisfaction and retention.
- **Customer Query Resolution:** Addressed and resolved customer queries and issues, providing accurate information and solutions in a timely manner.

COURSES

Junior Software Developer

DDU GKY , Coimbatore

📅 01/2022 - 03/2022

PROJECTS

Employee Management Time Sheet App(Agile Methodology)

- Developed a healthcare-focused application for managing employee timesheets, integrating features like authorization workflows and billing management.
- Collaborated with the back-end team to implement secure API integrations for handling sensitive healthcare billing data.
- Followed **Agile Methodology** for development, ensuring iterative improvements and timely delivery of features.

Booking Rider App

- Developed a healthcare-focused pick-up and drop-off application to assist patients and healthcare providers with transportation needs.
- Implemented key features, including **ride scheduling**, **routed trips**, **ride cancellation**, and **dispatch management** for seamless operations.
- Enhanced user experience with real-time ride tracking and driver-client communication modules.
- Worked collaboratively with cross-functional teams using **Agile Methodology**, ensuring timely delivery and continuous improvement of the product.
