SKILLS SUMMARY

- **Testing Types:** Functional, Non-Functional, Regression, Smoke, Sanity, Integration, Black Box, UI, Performance, Browser, User Acceptance Testing (UAT)
- **Testing Processes:** SDLC (Software Development Life Cycle), STLC (Software Testing Life Cycle)
- **Tools:** Airtable (Bug Tracking)
- **Knowledge Base:** Brief Database, Brief API Testing
- **Test Design:** Creating Test Cases, Writing Test Scenarios, Bug Reports, Test Plans
- **Programming:** Brief Knowledge Of Python
- **Operating Systems:** Windows, MacOS, Linux (Optional: Any Specific OS Versions Or Others If Applicable)
- **Product Experience:** Food Delivery Solutions, E-Commerce Platforms, EV Charging Applications
- **Client Interaction:** Communicated Directly With Clients To Understand Project Requirements, Clarify Testing Scope, And Provide Feedback.
- **Soft Skills:** Attention To Detail, Problem Solving, Analytical Thinking, Team Collaboration, Effective Communication
- **Leadership:** Informal Team Leading, Scenario-Based Test Planning, Mentoring Junior Testers

---

WORK HISTORY

Software Manual Tester
iCoderz Solutions, Ahmedabad

Feb 2023 – Present

- Performed manual testing across various projects, including e-commerce delivery, EV charging, and food delivery applications, ensuring seamless functionality and performance.
- Collaborated closely with front-end developers for UI testing, enhancing the user experience and interface accuracy.
- Expanded technical expertise by learning API testing with Postman, database testing, and load testing using JMeter.
- Recognized as a quarterly achiever for strong project management and high-quality testing.
- Conducted User Acceptance Testing (UAT) and collaborated with clients to validate software against project requirements, contributing to client satisfaction and project success.

Software Manual Tester Intern
Alphawizz Technology, Indore

08/08/2022 – 08/11/2022

- Gained hands-on experience in various testing types, including functional, regression, and smoke testing under the guidance of senior testers.
- Assisted in writing and executing test cases, identifying defects, and reporting them using MS Excel.
- Acquired knowledge of software development life cycle (SDLC) and software testing life cycle (STLC), enhancing understanding of the entire product development process.
- Collaborated with team members to analyze project requirements and contribute to quality assurance efforts across different testing phases.

EDUCATION

Master of Computer Applications

School of Computers IPS Academy, Indore, MP

2021

PROJECTS

Koalas
Online Liquor Delivery Platform

Koalas is an online liquor delivery service providing a wide selection of alcoholic beverages, focusing on a seamless shopping experience.

- Conducted functional and regression testing across the platform's shopping and checkout flows to ensure usability and prevent issues.
- Verified backend and frontend integrations to ensure accurate order processing, tracking, and timely delivery.
- Executed cross-browser testing to ensure the platform's consistent performance on various web browsers.

Leaves
Progressive Web App (PWA)

Leaves is a Progressive Web App designed to create virtual biographies and personal stories using AI-generated content, offering users a personalized and engaging experience.

- Tested the AI-based content generation process to ensure accurate and coherent virtual biographies.
- Conducted functional and UI testing to verify seamless user interactions and efficient data input workflows.
- Performed regression testing to maintain platform stability during updates and AI model improvements.

Sonik Mobility
EV Charging Platform

Sonik Mobility enables users to easily book EV charging stations efficiently, enhancing the electric vehicle charging experience with seamless reservations and real-time station availability.

- Performed end-to-end testing of the booking functionality to validate seamless user experience and booking accuracy.
- Collaborated with the development team to address usability and reliability issues, improving user satisfaction.
- Conducted UI testing across different devices and screen sizes to ensure the platform was responsive and user-friendly.

Juiced Fuel
Online Fuel Delivery Service

Juiced Fuel allows users to reserve time slots for fuel delivery, ensuring convenience and efficiency for customers.

- Led functional testing to validate booking processes and fuel type selection accuracy.
- Conducted performance testing to verify system scalability and order management efficiency.
- Executed database testing to validate data accuracy and ensure smooth order tracking and delivery schedules.
