Work Experience:

Senior Consultant – QA Automation Engineer
Oracle Financial Services Software Limited (July 2022 – Present)

- Developed and maintained comprehensive test cases and automation scripts using Selenium WebDriver and TestNG, reducing manual testing efforts by 45%
- Led and facilitated Scrum ceremonies, including Sprint Planning, Daily Scrum, Sprint Reviews, and Retrospectives, ensuring smooth sprint execution and effective team collaboration
- Collaborated closely with customers and stakeholders to gather and analyze requirements, ensuring clear understanding and alignment with project goals
- Played a key role in driving backlog grooming sessions, refining user stories, and prioritizing features based on business needs and customer feedback
- Conducted extensive API testing using Postman and Swagger, ensuring seamless integration and high system reliability during the migration from on-premise to AWS
- Performed full functional testing during the AWS migration, ensuring high-quality deliverables across all modules and verifying successful system integration
- Verified application logs using Splunk and Kibana to identify and resolve issues, ensuring smooth operations and minimizing downtime during the migration process
- Actively contributed to remove team impediments and improving overall team productivity through proactive facilitation and coaching
- Played a pivotal role in ensuring timely completion of UAT testing by actively supporting the UAT Team
- Created a Java utility for remote server operations, improving operational efficiency by 20%

Test Engineer
Infosys Limited (June 2018 – July 2022)

- Built and maintained an automation framework using Selenium WebDriver and TestNG, improving regression test coverage by 35%
- Actively participated in Scrum ceremonies, including Sprint Planning, Daily Scrum, and Retrospectives, contributing to effective team collaboration and continuous delivery of high-quality software.
- Collaborated closely with stakeholders and product owners to gather and analyze requirements, ensuring alignment between business objective and technical deliverables.
- Worked with stakeholders to refine the requirements specifications, ensuring clarity and completeness for development and testing teams.
- Conducted functional, regression, and smoke testing, ensuring high-quality deliverables across web, mobile, and API layers.
- Facilitated refining user stories and prioritizing features based on customer and stakeholders' inputs. Actively sought and implemented feedback from retrospectives and peers to drive personal improvements and better support team objectives.
- Conducted API testing and mobile testing, ensuring cross-platform compatibility and reliability for Android and IOS devices
- Extensively used Jira for defect tracking and task management, facilitating transparent communication and collaboration within the team.
