Seeking a challenging position around Software Testing in a Professional Organization and allow development of my skills to organization potential in the field of Testing.

💼 Experience Summary

- **3.6 years of experience in Software Testing**, involved in all phases of the project lifecycle, with expertise in **manual and automation testing** across Web and Mobile applications.
- Strong expertise in **Functional, Regression, and Compatibility Testing**, ensuring seamless application performance.
- **Proficient in Selenium WebDriver** for web automation, **Postman** for API validations, and skilled in **test case design, execution, and defect management** using **JIRA**.
- Experience in **designing and maintaining automation frameworks** using **Selenium WebDriver, TestNG, and Maven** within **Eclipse IDE**.
- Good understanding of **Agile methodologies**, collaborating with **cross-functional teams** to achieve sprint goals and manage production incidents effectively.
- Hands-on experience with **GitHub and GitLab** for version control and test script management.
- Strong skills in **XPath, CSS Selectors, and dynamic object handling**, ensuring robust automation scripts.
- Experience in executing **cross-browser testing** on Chrome, Edge, and Firefox.
- Performed **API testing** using **Postman** to verify request-response integrity and functional correctness and **Rest Assured** for end-to-end API validation.

🖼 Work Experience

- **Krify Software Technologies Pvt. Ltd**: Sept 2020 to April 2024
  Designation: QA Engineer

🎓 Education

B.Tech, ECE   2015 – 2018
Aditya College of Engineering, Surampalem

Diploma, ECE   2012 – 2015
Aditya Engineering College, Surampalem

🧠 Technical Skills

- Languages   :   Core Java
- Database   :   SQL
- Web Servers   :   Apache
- Version Control Tools: Git
- Automation Tools: Selenium WebDriver, Rest Assured

💼 Projects

Krify software technologies Pvt. Ltd

Instanthandz	
Instanthandz is a service platform that connects homeowners with professionals for maintenance and household services.	
Period	04/2023 –04/2024
Technology Stack	Core Java, Selenium WebDriver, GIT, Rest Assured
Responsibilities	• Managed manual and automation testing for maintenance and household service applications and maintained Regression and Smoke test suites.

- Automated functional test cases using Selenium WebDriver.
- Performed API testing using Rest Assured.
- Identified and reported defects, ensuring timely resolution.

Maddog Extras	
Maddog Extras is a social platform for movie enthusiasts to engage in discussions, share reviews, and participate in themed events.	
Period	04/2022 – 03/2023
Technology Stack	Core Java, Selenium WebDriver, GIT
Responsibilities	• Designed and executed test cases for web and mobile applications. • Conducted functional, integration, and UI testing. • Automated regression test suites using Selenium WebDriver. • Performed API testing using Rest Assured. • Performed cross-browser testing on Chrome and Firefox.

Matchmade4You	
Matchmade4You is a dating application with video and audio call features to enhance user engagement.	
Period	09/2021 – 03/2022
Technology Stack	Functional testing, Postman, SQL, Jira
Responsibilities	• Developed and tested a dating app with video/audio call features. • Involved in Manual testing. • Working Independently and owning the responsibility for the Module and handling the team members. • Performed API testing using Postman. • Tracked and reported defects using JIRA. • Provided UAT support and handled client calls for UAT status updates.

Warehouse Entry Management	
Warehouse Entry Management is a warehouse inventory control system that manages entry, storage, and retrieval of goods efficiently.	
Period	09/2020 – 08/2021
Technology Stack	Functional testing, Postman, SQL
Responsibilities	• Evaluated all possible tools based on requirements. • Created and maintained Regression and Smoke test suites (manual validation). • Performed functional, integration, and regression testing for warehouse inventory systems. • Communicated with designers and developers to resolve product-related issues. • Conducted database validation using SQL queries. • Involved in defect reporting, tracking, and attending daily SCRUM meetings.
