SUMMARY

Detail-oriented and results-driven Software Tester with 3 years of experience in identifying, documenting, and resolving software defects using rigorous testing methodologies. Expertise in both manual and automation testing, with strong problem-solving abilities and excellent communication skills, ensuring the delivery of high-quality software products. Adept at collaborating with cross-functional teams in Agile and Waterfall environments to achieve project milestones.

SKILLS

Testing Techniques: Manual Testing, API Testing, Regression Testing, Functional Testing, Cross-browser Testing, Automation Testing, Mobile App Testing (Android & iOS)

Tools & Technologies: Postman, JIRA, Selenium WebDriver, TestNG

Database Management: SQL

Methodologies: Agile, Waterfall

PROFESSIONAL EXPERIENCE

Zsoft Consultancy Services Pvt Ltd

Junior Test Engineer | June 2022 – May 2024

Digital Techworks

Software Quality Analyst | March 2021 – March 2022

EDUCATION

B.E. in Civil Engineering

C. Abdul Hakeem College of Engineering and Technology | July 2014 – July 2018

Graduated with 60%

PROJECTS

Web Application - Survey and Questionnaire Management System

Developed a platform to create, publish, and manage online surveys and questionnaires, allowing users to collect and analyze responses efficiently.

Utilized responsive design principles for cross-browser compatibility and smooth user experience.

Web Application - Sports Management App

Designed and developed a comprehensive mobile app for sports data management, performance analysis, and community engagement.

Incorporated features for user roles such as admins, coaches, and athletes to manage and track athlete data effectively.

Mobile Application - Tamil Dictionary App

Created an educational app focused on teaching Tamil words through detailed explanations, audio, images, and related word information, aimed at all age groups.

Mobile Application - Online Course Booking App

Developed an app for booking online courses offered by various training centers, enabling users to easily explore, compare, and enroll in training programs.

WORK SUMMARY

- 3 years of hands-on experience in manual testing and automation testing, delivering high-quality software products.

- Proficient in designing test scenarios, writing detailed test cases, and executing test scripts for functional and regression testing.

- Adept at defect tracking, including the use of JIRA for bug reporting and resolution.

- Extensive experience in conducting data-driven testing with valid and invalid inputs.

- Strong focus on end-to-end testing of all software modules and ensuring product stability.

- Consistently updated test cases, documents, and reports to reflect changes and improve testing efficiency.

- Excellent communication skills for effective collaboration with both internal teams and customers.

TRAINING & CERTIFICATIONS

Selenium WebDriver Automation Testing Course (3-month training in Selenium with Java and TestNG)

Gained hands-on experience in automation testing, script writing, and test case automation using Selenium WebDriver.
