MAYUR PRAJAPATI

ANDROID/UNITY DEVELOPER

Phone: +91 9574821547

Email: prajapatimayur444@gmail.com

PROFESSIONAL SUMMARY

Experienced Android and Unity 3D VR Developer with a strong background in Java, Kotlin, Android SDK, and Unity XR development. Skilled in creating high-performance mobile applications and immersive VR experiences. Proficient in Android Studio and Unity, with a proven track record of optimizing app load times, increasing user engagement, and delivering innovative, user-centric solutions. Experienced in VR interactions, OpenXR, XR Interaction Toolkit, and VR performance optimization. Seeking a role in the IT industry to contribute to organizational growth through cutting-edge mobile and VR solutions.

TECHNICAL SKILL

- Unity C#
- Learn XR Toolkit & OpenXR
- Implement basic VR interactions (grabbing, teleporting)
- Optimize for performance (FPS, shaders)
- Build VR app (like a VR gallery or simple interaction demo)
- Explore advanced topics (multiplayer, AI, full-body tracking)

- Java/Kotlin programming
- RESTful APIs integration
- Agile/Scrum methodologies
- Material Design
- MVVM/MVP architecture
- Performance optimization
- Debugging and troubleshooting

WORK EXPERIENCE

Unity/Android Developer | Nov - 2023 - Oct - 2024

Wcities Content Solutions India Pvt. Ltd.

- **Eventseeker** : Eventseeker is your personalised event service with a focus on minimising search and maximising discovery. We tap into your social, music and device libraries to find artists, teams, comedians and interests that are used to provide relevant alerts and recommendations on events in your area.
- **Cityseeker** : Cityseeker acts as your personal concierge for travel content and guides while you're on the go. Travellers and local residents increasingly require up-to-date and accurate information about points of interests, current events and local attractions in cities around the globe
- **Chargeseeker** : Chargeseeker is an app which is used to find out charging stations between your trip start and end location.Plan the ultimate road trip in your electric vehicle using Chargeseeker. Choose your starting point and destination and Chargeseeker will plan your route, including recommended stops at EV charging stations plus nearby points of interest like accommodation, shopping, cafe, attraction, outdoor activity etc.
- **Eventseeker-TV** : Eventseeker is your personalised event service with a focus on minimising search and maximising discovery. We tap into your social, music and device libraries to find artists, teams, comedians and interests that are used to provide relevant alerts and recommendations on events in your area.
- **Cityseeker-TV** : Cityseeker acts as your personal concierge for travel content and guides while you're on the go. Travellers and local residents increasingly require up-to-date and accurate information about points of interests, current events and local attractions in cities around the globe.

Senior Android Developer/ Unity Developer | Feb -2022 - Nov - 2023

Surbhi Infotech

- **Salon Application**: The salon application allows users (clients) to sign up, browse salon services, view pricing, and book appointments. Clients can manage their profile, make payments, and track appointment history. On the admin side, the administrator can manage user accounts, approve appointments, update service details, set pricing, and offer promotions. Additionally, the admin handles salon staff management and tracks business performance.
- **Unity 3D Development**: Unity project is designed for a virtual reality (VR) experience where users can explore the interior and exterior of a building. It will include detailed environments, lighting optimization, and interactive elements for a realistic walkthrough experience.

Senior Android Developer | Jan-2018 - Feb - 2022

Softieons Technology

- A service-based application is an app structured around independent services that perform specific tasks and communicate via APIs. This modular approach allows for easier maintenance, scalability, and flexibility. Each service handles a unique function, making the application more resilient and adaptable to change or high demand.

Android Developer | Apr-2016 - Jan - 2018
